Subject: RE: MEW Monitoring Well keys

I just talked with Dave. Greg Bach will do the site inspection and sampling oversight. It would be beneficial to sit down with Dan and me to discuss the current status of the site as soon as possible.

Thanks,

Jeffrey L. Field, Chief

Pauletta, I included all of the well keys I had in the package of lit hold documents I sent to you through interoffice mail when the project was assigned back to you a few months ago.

I do not remember the specific details of EPA's site access agreements. I also have no knowledge of the scope of the investigation you've planned, so I can't tell if what we do have will be adequate.

I will discuss field oversight with Dave and Jeff.

Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.

Dan -- Field work for five year review sampling is scheduled for next week. Can you oversee? If not, SPEB may be able to assist. Can you answer Jeff's questions below?

I will be at FOH this morning for the first part of my exit physical.

Pauletta,

Confirming site access (especially on the former operations site since coring thru concrete is required) and obtaining monitoring well keys are two things we will need prior to fieldwork. Email or call with any details.

Thanks,
